# Business Impacts of Poor Inventory Optimization

# Typical Inventory Pains

- Time-consuming, manual administration
- Excess stock
- Too much capital tied up in stock
- Poor service levels to customers
- Lack of inventory control
- Difficulty identifying demand patterns
- High risk of run out
- Frequent rush orders
- Low product turnover
- Lack of visibility over the stock location network

# 20 Years of Inventory Expertise

Leading solution for inventory optimization since 1999

Globally supported organization with users in 100+ countries

Strong product development focus with frequent releases

Fast, easy and intuitive for small- & mid-sized businesses

Cloud-based solution that integrates with all ERPs

Built on Synchron's powerful technology

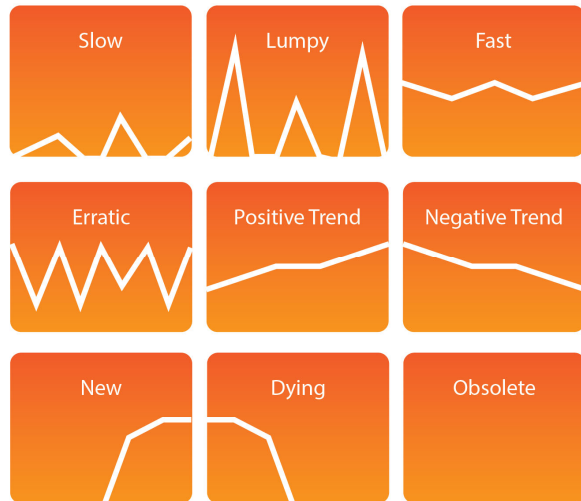

EazyStock is built with Synchron's powerful technology but is adapted to the needs of SMBs
